

## Maliderma™ Clinical Strength Body Care For Problem Skin

Maliderma™ Clinical Strength Body Wash and Body Lotion have been formulated with a unique blend of organic amino acids to help relieve skin care problems.

The amino acid complexes help reduce the appearance of redness and scaling caused by problem skin conditions, especially psoriasis. Maliderma will most likely replace prescription medications and help restore skin to its natural, healthy state.

Most effective when the body wash and lotion are used together.

**We offer a 100% satisfaction guarantee.**

**DIRECTIONS:** While in the tub or shower, apply Maliderma Body Wash to a soft sponge or cloth. Gently massage the rich foam over entire body for at least 30 seconds. Rinse off completely with warm water. Pat body dry with a soft towel. Apply a liberal amount of Maliderma Body Lotion to affected areas and massage until the lotion is absorbed into the skin. The Body Lotion can be used several times a day for optimum results. Note: do not use body wash or lotion on areas of the body with open sores.

### FEATURES & BENEFITS:

- Contains Maliderma's exclusive blend of amino acids and vitamins (L-Cysteine HCL, L-Cystine, DL-Methionine, Inositol, Biotin) to help reduce redness, itching and scaly skin.
- Contains special conditioning compounds to help keep your skin soft and silky smooth.
- Contains a special wheat protein complex – clinically proven to moisturize very dry skin.
- Contains natural oils and vitamins for moisturizing and anti-oxidant benefits.
- Suitable for all skin types. Helps maintain maximum healthy appearance and reduce signs of aging.
- Non-greasy.
- Perfect for men or women.
- Safe on our environment.
- pH balanced for optimum performance.
- Not tested on animals.
